Step 1

Crop

1. Use the marquee tool on the left tool pane and trace around your desired area.
2. Go to the top menu → image → Crop
Step 2

1. Go select → Color Range.
2. Set the fuzziness to 40
3. Choose the eye dropper tool
4. Hover the eyedropper over the green background.
5. Hold down shift and click the eydoppper around the green background till your preview image shows just your images in black and the background in white.
6. Click OK.
Step 3

Make the edges a bit softer and better blended.

1. Click select → Modify → Expand → Set to expand by 2 pixels and click OK
2. Click select → Feather → Set to feather edges by 1 pixel and click OK
Step 4  Get rid of the background
1. Go to the layers tab at the bottom right of the screen. If your image is labelled as a background, you will need to change it as a layer in order to remove the background. To do so, just grab the lock icon and drag it into the trash icon.
2. Once your image is a layer, you can hit backspace to remove the background.
3. Then hit Ctrl D to deselect the image.
Step 5

Fix up
You will likely still have green tinges around the edge of your figure. To fix this:
1. Go back to the layers pane, and at the very bottom right of the screen expand the menu option for layer adjustments.
2. Go to hue adjustments.
3. On that pane, drop down from ‘master’ to ‘green.’
4. Zoom in your image to an area with green tinge.
5. Use the dropper tool to select. Then go back to the hue adjustment pane, and drag the saturation slider to zero.
Step 6  
Merge layers  
Once you have your green tinges cleaned up, go back to the layers pane.  
1. Left click on the layers one by one while holding shift.  
2. Once they’re all selected, right click and merge layers.
Step 7

Put image onto desired background

1. Find the image you want as your new background. Save it to your computer.
2. In photoshop: File --> Open --> Open up image. It will open as a new tab in photoshop.
3. Return to your green screen photo. Press CTRL C to copy.
Step 8

Move and size
1. To move your image to desired location, hit the move icon, it will be the first option on the left-hand icons. Click your cut out and drag.
2. To resize your cut out while leaving the background image the same size, dropdown the edit menu on the top toolbar. Edit --> Transform --> Scale.
3. Then drag a corner of your image to change to desired size.

1) Select the move icon.

2) Dropdown edit. Go to transform and scale. Scale image by dragging corner of the image.
